Ultrasound Therapy & Imaging

MOBILE

COMPACT

EASY

Localized and controlled
HIFU* delivery
Targeted treatment
for organ preservation

Skin cooling and protection
of sensitive structures
Built-in controls
for a safe treatment

A 4-step procedure
Simple and intuitive
user interface

*HIFU for High Intensity Focused Ultrasound

YOUR PATIENT'S
CHOICE
NON-INVASIVE AND SCARLESS

Outpatient procedure

"I went to the hospital **as an outpatient and came out shortly afterwards the same day.**
It all went well."

Gentle procedure

"I said to myself: **no general anesthesia and no surgery** – I'll have this."

Organ preservation

"I chose echotherapy because **I didn't want to have my thyroid removed.**
I didn't want to have medication for life."

Quality of life

"I thought it was good **that there were no scar and no wound.**
I have another fibroadenoma which I would also like to have treated using echotherapy."
