

## **Theraclion Announces Reimbursement to 15 Million covered German lives**

### **The pronova BKK and the BKK Deutsche Bank now cover echotherapy**

**Malakoff - FRANCE, December 13th, 2017 - THERACLION** (Euronext Growth, FR0010120402 – ALTHE), a company specialized in leading-edge medical equipment for ecotherapy, today announced that both the pronova BKK and the BKK Deutsche Bank have joined the integrated care contract for ecotherapy, expanding access for German patients to non-invasive echo therapy for breast fibroadenomas and thyroid nodules.

The pronova BKK is a national insurance company insuring 670,000 Germans, with around 80 offices all over Germany. Based in Ludwigschafen (Baden-Württemberg), it is the fourth-largest BKK in Germany with a historical focus in the South West of Germany. It has its roots in the big companies such as Bayer, BASF, Ford and Continental and covers 60 000 other employers in Germany.

Based in Düsseldorf, the BKK Deutsche Bank insures 81 000 Germans and is the dedicated insurer for employees of the Deutsche Bank, but open for all Germans.

Since September 2014 and the first reimbursement of its innovative ecotherapy solution Echopulse with Continentale BKK in Germany, 25 health insurance companies reimburse ecotherapy; more joined this month, bringing the total to 27 insurance companies covering this non-invasive solution. In Germany ecotherapy is currently available in 12 centers and close to 15 Million Germans are covered by their health insurance in case of need of a treatment.

“The pronova BKK in particular is an important player in the German health insurer cosmos” says David Caumartin, CEO Theraclion. “The coverage by more, bigger players is an encouraging sign for the development of ecotherapy in Germany”.

### **About Theraclion**

Theraclion is a French company specializing in high-tech medical equipment using therapeutic ultrasound. Drawing on leading-edge technologies, Theraclion has designed and manufactured an innovative solution for ecotherapy, the Echopulse®, allowing non-invasive tumor treatment through ultrasound-guided high-intensity focused ultrasound. Theraclion is ISO 13485 certified and has received the CE mark for non-invasive ablation of breast fibroadenomas and thyroid nodules. Based in Malakoff, near Paris, France Theraclion has brought together a team of 35 people, 50% of whom are dedicated to R&D and clinical trials.
